1. Introduction

Section guidelines:

a) List of the team members, allocation of tasks (student 1 to 4), and topic of the website.

Student Name	Student Role
Methma Jayasuriya	Student 1
Thisanthan Rukmanikanthan	Student 2
Nimni Kumarasiri	Student 3
Anjula Jayasekara	Student 4

Website Topic – Tourism

Website Name – Travel Sri Lanka

Website includes details Top-destinations in Sri Lanka – Colombo, Kandy, Galle, and Jaffna.

b) Include the summary table of your contributions to the group meetings.

Group Coursework Meetings (minimum 5 meetings, e.g., one per week)		
1	**Date & Time:**	17/06/2023 – 12.30 p.m.
	Objective:	Coursework planning & Student role assigning
	Attended:	All Students attended
	Your Contribution:	Took the Student role 2. Suggested Tourism as our website topic.
2	**Date & Time:**	24/06/2023 – 12.30 p.m.
	Objective:	To discuss about the website logo and additional content webpage.
	Attended:	All Students attended
	Your Contribution:	Provided feedback on selected logo and suggested a theme color for the website.
3	**Date & Time:**	01/07/2023 – 12.30 p.m.
	Objective:	To discuss about the presentation page, main (home) page, shop, quiz, site map and about us page.
	Attended:	All Students attended
	Your Contribution:	provided the required HTML, External CSS and External JavaScript codes for the Navigation Bar as per the coursework specifications.
4	**Date & Time:**	12/07/2023 – 7.30 p.m. (Online)
	Objective:	Progress Meeting
	Attended:	All Students attended
	Your Contribution:	I provided feedbacks and opinions on the layout, presentation and codes.
5	**Date & Time:**	22/07/2023 –. 12.30 p.m.
	Objective:	Finalizing
	Attended:	All Students attended
	Your Contribution:	Finalized the html, CSS, java scripts and validated without any errors

2. Technical Discussion

Student 2 Tasks:

Common Choices

- The project follows standard document guidelines by using HTML5 as the document type, ensuring compatibility and modern features. English language is consistently assigned to all webpages using the "lang" attribute, aiding search engines and accessibility tools. UTF-8 encoding is specified in the "meta" tag to support various languages and special characters. Furthermore, the **"Nav.css"** and **"Footer.css"** stylesheets are linked to all pages, ensuring a consistent and cohesive design for the navigation bar and footer elements.

- In accordance with the coursework specifications, it is mandatory for every web page that is created to include a Page Editor page at the end of the page. This requirement is met by implementing the footer element this creates the footer section at the bottom of the webpage, typically used for additional information and links related to the entire page. An element this represents an anchor link that points to the "PageEditor2.html" page. Users can click on the link to navigate to the specified "Page Editor" page

```html
<!DOCTYPE html>
<html lang="en">

<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>TravelCeylon</title>
  <link rel="stylesheet" href="MainPage.css">
  <link rel="stylesheet" href="Nav.css">
  <link rel="stylesheet" href="Footer.css">
</head>
```

```html
<footer>
  <p>&copy; 2023 TravelCeylon. All rights reserved.</p>
  <ul>
    <li><a href="PageEditor2.html">Page Editor</a></li>
  </ul>
</footer>
```

1. Main (Home) page

The main page includes the codes for the navigation bar and the “a href” attributes are used to specify the URL of the destination of the hyperlinks, which in this case are the hyperlinks for the external CSS, images and linking the additional content pages to the corresponding image buttons.

```
<div class="destinations">
  <div class="heading">
    <h2>| Top-destinations in Sri Lanka |</h2>
    <p>EXPLORE A DIFFERENT WAY TO TRAVEL</p>

  </div>
  <div class="grid-container">
    <a href="Colombo.html" class="grid-item">
      <img src="Asserts/Colombo1.jpeg" alt="Colombo">
      <p class="image-description">Colombo</p>
    </a>
    <a href="" class="grid-item">
      <img src="Asserts/kandy.jpeg" alt="kandy">
      <p class="image-description">Kandy</p>
    </a>
    <a href="" class="grid-item">
      <img src="Asserts/Galle.webp" alt="Galle">
      <p class="image-description">Galle</p>
    </a>
    <a href="" class="grid-item">
      <img src="Asserts/Jaffna.webp" alt="Jaffna">
      <p class="image-description">Jaffna</p>
    </a>
  </div>
</div>
```

The above HTML code has a “div class” named “destinations” which includes two other “div class”, named as grid-container and heading. The heading class contains the title and a subtitle for the section. The grid-container class serves as a container for individual destination items. There are four anchor tags inside the grid-container div. Each anchor tag represents a link to a specific destination. Each img tag is used to display an image related to the destination.

```
<div class="video-block">
  <h3>Sri Lanka</h3>

  <div class="video-container">
    <video controls>
      <source src="Asserts/SriLankaTourism.mp4" type="video/mp4">
      Your browser does not support the video tag.
    </video>
  </div>
</div>
```

The Above HTML code creates a video block showcasing a video about Sri Lanka. The block includes the title "Sri Lanka" (h3 heading) and a container for the video. The video is embedded using the <video> element with the "controls" attribute, allowing users to control playback. The video's source file is specified as "Asserts/Sri LankaTourism.mp4" with the type "video/mp4". If the user's browser does not support the video tag, a fallback message will be displayed. This code enables users to watch and enjoy the Sri Lanka video with ease.

```
<script>
  function scrollToTop() {
    window.scrollTo({ top: 0, behavior: "smooth" });
  }

  window.addEventListener("scroll", function () {
    var topButton = document.querySelector(".top-btn");
    if (window.scrollY >= 200) {
      topButton.classList.add("show-top-btn");
    } else {
      topButton.classList.remove("show-top-btn");
    }
  });

</script>
```

```
<button onclick="scrollToTop()" class="top-btn">Return to Top</button>
```

The above JavaScript is Used for the “Scroll to top” function. When the user clicks on a Return to top button, The function uses window.scrollTo() to achieve the smooth scrolling effect.

2. Comments Form Page

Customers who want to give their opinions on a product or service should use this section of the feedback form. Name, Email, and Comment are the three fields and two additional 2 dropdowns that are present on the form. Users can fill up the name and email input fields with their information. Customers can provide feedback on the very good service in a text field. Using the form's rating system, people can assess the product or service. From "Very bad" to "Very Good," the scale has five possible grades.

```
<div class="container">
    <form name="myform" action="mailto:thisanthan.20223209@iit.ac.lk" method="post" enctype="text/plain"
        onsubmit="showThankYouMessage()">
        <label for="first_name"><b>YOUR NAME</b></label>
        <input type="text" name="first_name" placeholder="Enter Your Name" id="first_name" required>
        <label for="email"><b>YOUR E-MAIL ID</b></label>
        <input type="email" name="email" placeholder="Enter Your Email" id="email" required>
        <label for="AnyFeedback"><b>YOUR FEEDBACK</b></label>
        <textarea name="Any Feedback" placeholder="Enter Your Comment" cols="22" rows="05" id="AnyFeedback"
            required></textarea>
        <label for="howToComplete" ><b>HOW DID YOU WANT TO COMPLETE THIS TASK TODAY? (OPTIONAL)</b></label>
        <select name="selection1" id="howToComplete">
            <option disabled selected>--Please Select--</option>
            <option value="Phone">Phone</option>
            <option value="Website">Website</option>
            <option value="Webchat">Webchat</option>
            <option value="Social media">Social media</option>
            <option value="Email">Email</option>
        </select>

        <label for="howToCompleteAgain"><b>IF YOU HAD TO COMPLETE THIS TASK AGAIN,
                <br>HOW WOULD YOU PREFER TO DO IT? (OPTIONAL)</b></label>
        <select name="selection2" id="howToCompleteAgain" >
            <option disabled selected>--Please Select--</option>
            <option value="Phone">Phone</option>
            <option value="Website">Website</option>
            <option value="Webchat">Webchat</option>
            <option value="Social media">Social media</option>
            <option value="Email">Email</option>
        </select>
```

The above HTML code represents a feedback form on a website. The div class "container" element creates a container to hold the form. The form uses the "mailto" action to send feedback to "thisanthan.20223209@iit.ac.lk" via email. The form includes input fields for the user's name and email, a text area for comments, and two optional dropdown menus for providing feedback on completing the task and preferences for future completion. Finally, a label requests the user to rate the website based on their user experience.

```
<table>
    <tr>
        <td class="rate">Very Bad</td>
        <td class="rate">Bad</td>
        <td class="rate">Fair</td>
        <td class="rate">Good</td>
        <td class="rate">Very Good</td>
    </tr>
    <tr>
        <td>
            <input type="radio" name="rate" value="Very Bad" id="verybad" required>
        </td>
        <td>
            <input type="radio" name="rate" value="Bad" id="bad" required>
        </td>
        <td>
            <input type="radio" name="rate" value="Fair" id="fair" required>
        </td>
        <td>
            <input type="radio" name="rate" value="Good" id="good" required>
        </td>
        <td>
            <input type="radio" name="rate" value="Very Good" id="verygood" required>
        </td>
    </tr>
</table>
```

The above HTML code represents a table-based rating scale. The <table> element creates a table structure to organize the rating scale. Each rating category, ranging from "Very Bad" to "Very Good," is displayed in separate table data cells (<td class="rate">). Below the rating categories, there is a row with radio input elements (<input type="radio">) corresponding to each rating option. Each radio input has a unique name "rate" to group them together as a set of choices. The "value" attribute of each input indicates the corresponding rating option, such as "Very Bad," "Bad," "Fair," "Good," and "Very Good." The "id" attribute for each input is optional but can be used for styling purposes. The "required" attribute is used to enforce that the user must select one of the rating options before submitting the form.

```
<script>
    function showThankYouMessage() {
        alert(
            "Dear " +
            document.getElementById("first_name").value +
            ", Thank you very much for your feedback. You have rated our site as " +
            document.querySelector('input[name="rate"]:checked').value +
            "."
        );
    }
</script>
```

The above JavaScript function used the user clicked the submit button then show the pop-up message box to the user. The function showThankYouMessage() is defined, which will be executed when called. The “alert” method used for pop-up message.

2. Page Editor Page

```
<main>
    <img class="profile-image" src="Asserts/thisan.jpeg" alt="Editor's Profile Image">
    <h2>About Me</h2>
    <p>
        Name : Thisanthan Rukmanikanthan<br>
        Role : Student 2<br>
        IIT ID : 20223209<br>
        UoW ID : W1998661
    </p>

    <h2>My Work</h2>
    <ul>
        <li>
            <p>Made the theme and structure of the homepage.</p>
        </li>
        <li>
            <p>Allocated navigation bars to connect pages.</p>
            <a href="MainPage.html">Link to Main page</a>
        </li>
        <li>
            <p>Implemented the Header and Footer Including External CSS for them.</p>
        </li>
        <li>
            <p>Created a Dynamic Query Form which is validated and can be Sent through Email.</p>
            <a href="Comments.html">Link to Feedback page </a>
        </li>
        <li>
            <p>Created a additional content page for Sri lanka destinations</p>
            <a href="Colombo.html">Link to Colombo Destination Page</a>
        </li>
    </ul>
```

The above HTML codes represents within the main element. This element represents the main content of the web page. I used img tag for displaying the profile image of my, In the <p> tag containing information about my Name, Role, IIT ID, UoW ID. Within the p tag I used 3
 tags for break the next line. In the <ul> tag containing several list items <li>. In the list items that includes description of my work.

4. Content Page

```
<h1>Colombo</h1>
<h3>"Where Traditions Meet Modern Marvels - Explore Sri Lanka's Dynamic Capital City"</h3>
<div class="place">
    <p>Colombo, the vibrant capital city of Sri Lanka, is a captivating blend of history, culture, and modernity.
        Nestled on the western coast of the island, Colombo is a gateway to the wonders of Sri Lanka. With its
        bustling
        markets, colonial architecture, and diverse culinary scene, this cosmopolitan city offers a unique
        experience to
        travelers.
        Explore the colonial-era buildings in the Fort area, wander through the colorful streets of <b>Pettah</b>,
        or visit
        the
        sacred <b>Gangaramaya Temple</b>. Indulge in shopping at modern malls or haggle for souvenirs at local
        markets.
        Immerse yourself in the rich history and art at the <b>National Museum</b> or unwind in the serene beauty of
        <b>Galle
            Face
            Green</b>, a popular seafront promenade.
        Colombo is also a food lover's paradise, with a wide range of restaurants serving delicious local delicacies
        and
        international cuisine.
        Whether you seek history, culture, or a vibrant urban atmosphere, Colombo is a city that will leave you
        enchanted.
    </p>
</div>
```

The above HTML code represents a section about Destination. The <h1> heading displays the title destination. The div class="place" element acts as a container for the content related to destination. The <p> element contains a detailed description of destination.

5. Nav Bar

```
<nav>
  <ul>
    <li><a href="PageEditor2.html" class="logo"><img src="Asserts/logo.png" alt="Logo"> </a></li>
    <li><a href="MainPage.html" class="active">Home</a></li>
    <li><a href="">Shop</a></li>
    <li><a href="">Quiz</a></li>
    <li><a href="">Gallery</a></li>
    <li><a href="">Site Map</a></li>
    <li><a href="Comments.html">Comments</a></li>
    <li><a href="">About Us</a></li>
  </ul>
</nav>
```

The above HTML code represents a navigation bar for all pages. The <nav> element creates a navigation bar section on the webpage. Within the <nav> element, there is an <ul> element, representing an unordered list to organize the navigation items. The first list item (<li>) contains an <img> element with the source "Asserts/logo.png" for displaying a logo. The "alt" attribute is indicating the alternative text logo and if user clicked the logo then it returns to Page Editor page.

The remaining list items are navigation links (<a> elements) for various sections of the webpage, such as "Home," "Comments," "Shop," "Quiz," "Gallery," "Site Map," and "About Us". The "href" attribute of each navigation link specifies the target page for the link. For example, "MainPage.html" links to the "MainPage.html" page, and "Comments.html" links to the "Comments.html" page. The first navigation link, "Home," is given the class "active," which is often used to visually indicate the current active page or section.

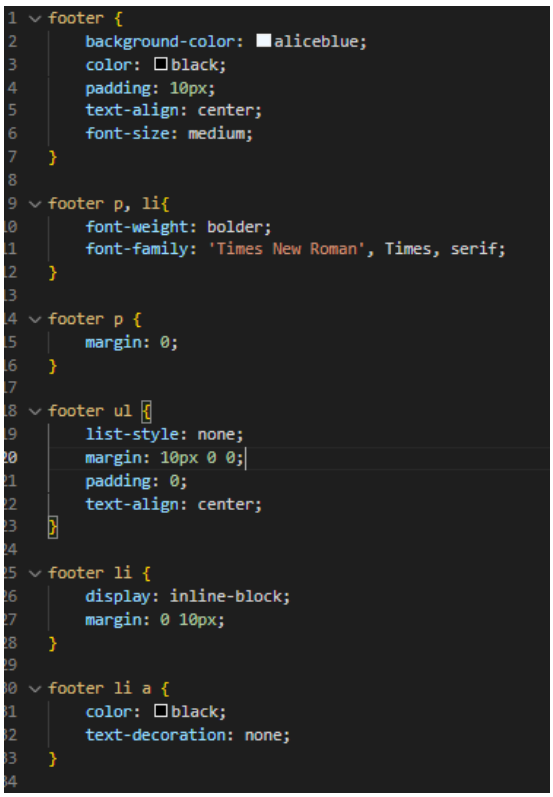

```
nav {
    background-color: transparent;
    height: 65px;
    margin-bottom: 30px;
    justify-content: center;
}
```

The above CSS codes contains style of nav bar. The background color I put transparent for looks good. The navigation element will have a fixed height of 65 pixels. I used “justify-content” – center used for it centers the flex items (the content inside the navigation) along the main axis.

```
nav ul li a.active {
    background-color: #F07C39;
    padding: 8px 15px;
    color: black;
    border-radius: 20%;
}
```

The above CSS codes contain background-color “#F07C39” this sets the background color of the active anchor link to "#F07C39," which is an orange-ish color. padding: 8px 15px this adds 8 pixels of padding to the top and bottom and 15 pixels of padding to the left and right of the active anchor link. The padding creates space inside the link, making it visually more distinct and easier to click. color “black” This sets the text color of the active anchor link to black. The text inside the link will appear in black. border-radius: 20%: This sets a border-radius of 20% for the active anchor link. This creates rounded corners for the link, giving it a rounded appearance.

5. External style sheet for website (Footer)

```css
footer {
    background-color: aliceblue;
    color: black;
    padding: 10px;
    text-align: center;
    font-size: medium;
}

footer p, li{
    font-weight: bolder;
    font-family: 'Times New Roman', Times, serif;
}

footer p {
    margin: 0;
}

footer ul {
    list-style: none;
    margin: 10px 0 0;
    padding: 0;
    text-align: center;
}

footer li {
    display: inline-block;
    margin: 0 10px;
}

footer li a {
    color: black;
    text-decoration: none;
}
```

The above CSS code defines I used background color for the footer is aliceblue, The color sets the text color of the footer to black. The padding adds 10 pixels of padding around the content inside the footer. The padding creates some space between the content and the edges of the footer. The text-align centers the text content (paragraphs and list items) inside the footer. The font size of the text inside the footer to the medium size. The font family for the footer is 'Times New Roman', Times, serif.

I had requested all members to adapt the same external style sheet as per the coursework specification.

3. Webpage Validation Statement

I validated the following pages using The W3C Markup Validation Service (https://validator.w3.org/).

- Main Page
- Comments Form
- Page with Additional Content

The validation tool verified that all three pages meet web standards. The pages were determined to be error-free.

4. Janet

In order to meet with Janet regulations, policies, and legal requirements, a website must follow guidelines on accessibility, privacy, security, copyright and intellectual property, Janet policies, and pertinent legal requirements. This includes following Janet policies and meeting applicable legal requirements, as well as following the Web Content Accessibility Guidelines and the General Data Protection Regulation. It also involves following Janet policies and following relevant legal requirements, as well as using secure protocols, respecting copyright and intellectual property laws, adhering to Janet policies, and adhering to relevant legal requirements. To guarantee compliance, a website should have a clear privacy policy, provide easy-to-use tools for users to control their data, monitor and update security measures, and seek legal advice. On this page, you will find information about accessibility, security, copyright and intellectual property, Janet policies, and applicable regulatory requirements. References Provide references to resources you have used.

    <h1>Colombo</h1>
    <h3>"Where Traditions Meet Modern Marvels - Explore Sri Lanka's Dynamic
Capital City"</h3>
    <div class="place">
        <p>Colombo, the vibrant capital city of Sri Lanka, is a captivating
blend of history, culture, and modernity.
            Nestled on the western coast of the island, Colombo is a gateway
to the wonders of Sri Lanka. With its
```

```
            bustling
            markets, colonial architecture, and diverse culinary scene, this
cosmopolitan city offers a unique
            experience to
            travelers.
            Explore the colonial-era buildings in the Fort area, wander
through the colorful streets of <b>Pettah</b>,
            or visit
            the
            sacred <b>Gangaramaya Temple</b>. Indulge in shopping at modern
malls or haggle for souvenirs at local
            markets.
            Immerse yourself in the rich history and art at the <b>National
Museum</b> or unwind in the serene beauty of
            <b>Galle
                Face
                Green</b>, a popular seafront promenade.
            Colombo is also a food lover's paradise, with a wide range of
restaurants serving delicious local delicacies
            and
            international cuisine.
            Whether you seek history, culture, or a vibrant urban atmosphere,
Colombo is a city that will leave you
            enchanted.

    text-decoration: underline;
}
```

- **Nav CSS**

```
nav {
    background-color: transparent;
    height: 65px;
    margin-bottom: 30px;
    justify-content: center;
}

nav ul {
```

```
    list-style: none;
    display: flex;
    justify-content: center;
    align-items: center;
    margin: 0;
    padding: 0;
}

nav li {
    margin: 0 10px;
    padding-right: 20px;
    padding-left: 20px;
    font-family: cursive;
    font-size: medium;
}

nav li img {
    height: 60px;
    width: 60px;
}
.logo:hover{
    background-color: transparent;
}

nav a {
    text-decoration: none;
    color: white;
}

nav a:hover {
    color: black;
    background-color: aliceblue;
    padding: 8px 20px;
    border-radius: 50%;
}

nav ul li a.active {
    background-color: #F07C39;
    padding: 8px 15px;
    color: black;
    border-radius: 20%;

}

nav ul li a.active:hover {
    background-color: aliceblue;
    padding: 8px 15px;
    color: black;
```

```
    border-radius: 20%;
}
```

- **External CSS**

```
footer {
    background-color: aliceblue;
    color: black;
    padding: 10px;
    text-align: center;
    font-size: medium;
}

footer p, li{
    font-weight: bolder;
    font-family: 'Times New Roman', Times, serif;
}

footer p {
    margin: 0;
}

footer ul {
    list-style: none;
    margin: 10px 0 0;
    padding: 0;
    text-align: center;
}

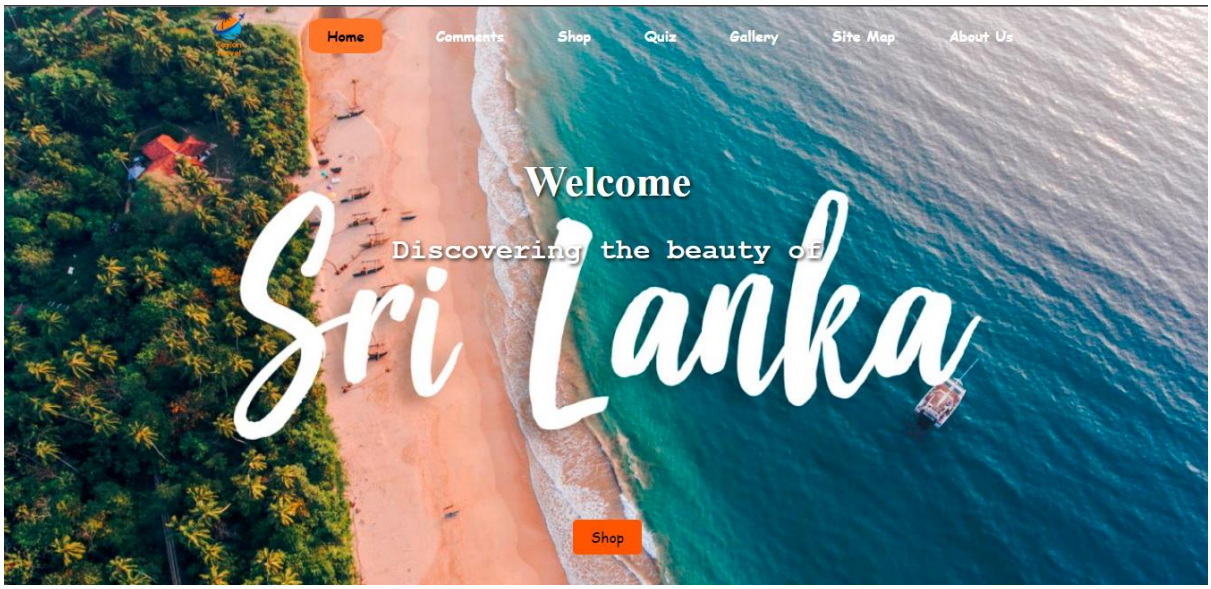

footer li {
    display: inline-block;
    margin: 0 10px;
}

footer li a {
    color: black;
    text-decoration: none;
}
```

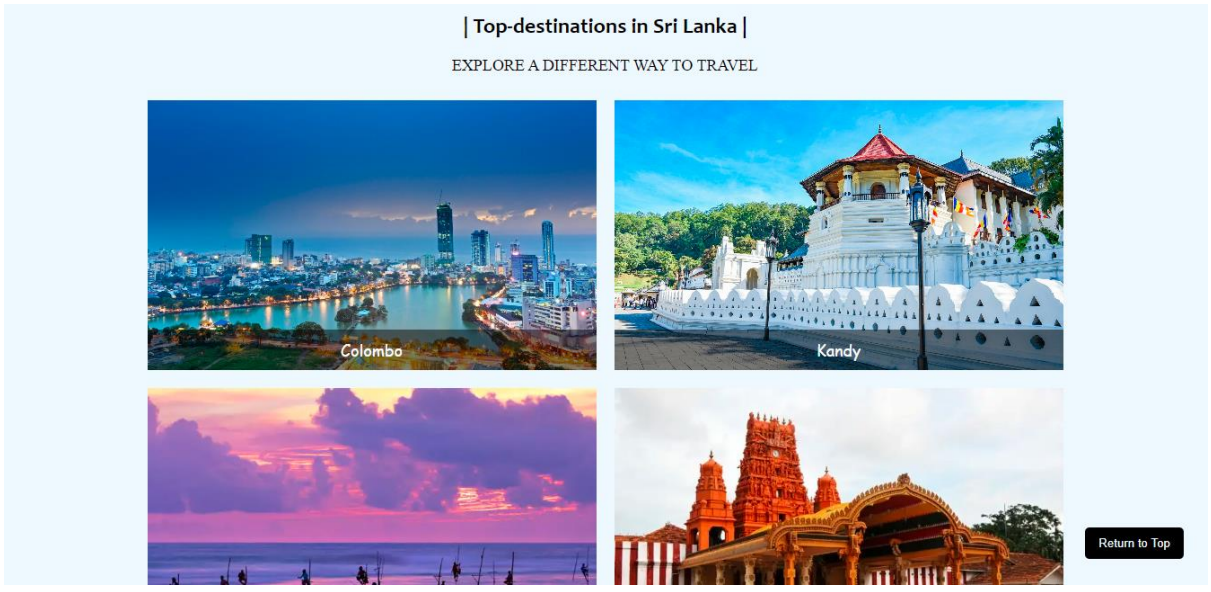

Appendix B: Screenshots

Provide a screenshot of all your web pages, in the following format:

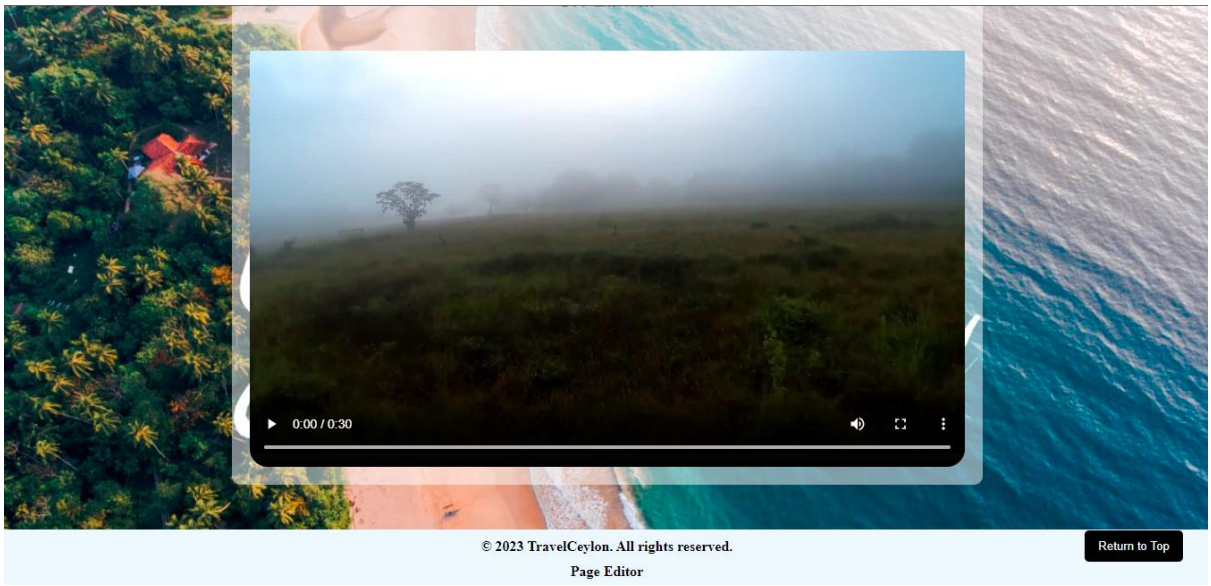

- **Main (Home) Page**

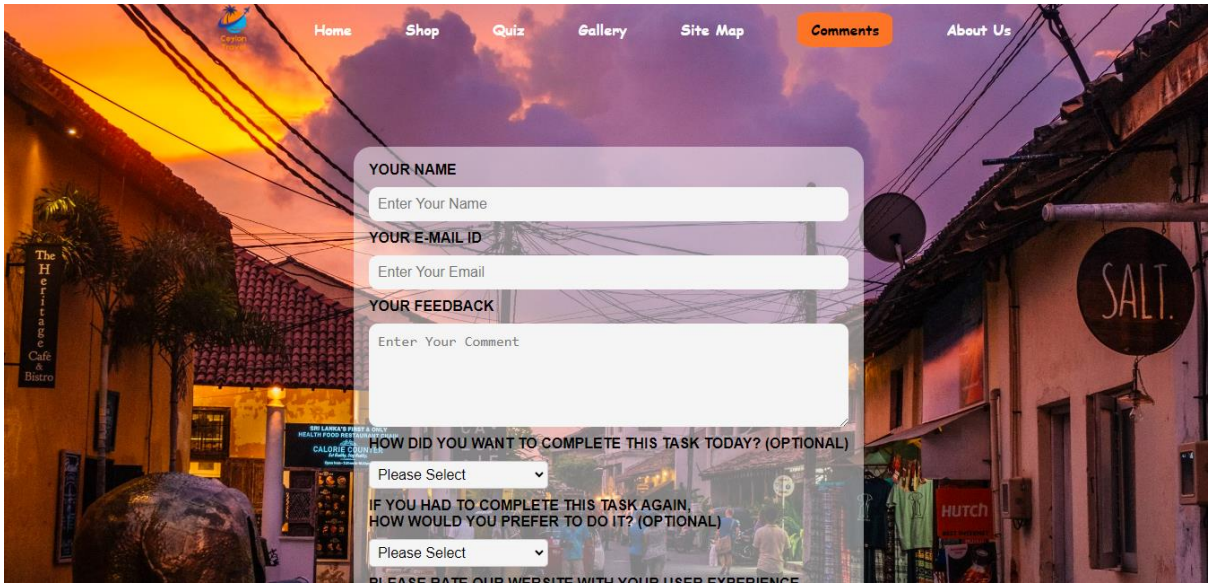

- **Image Buttons for Sri Lanka Destinations**

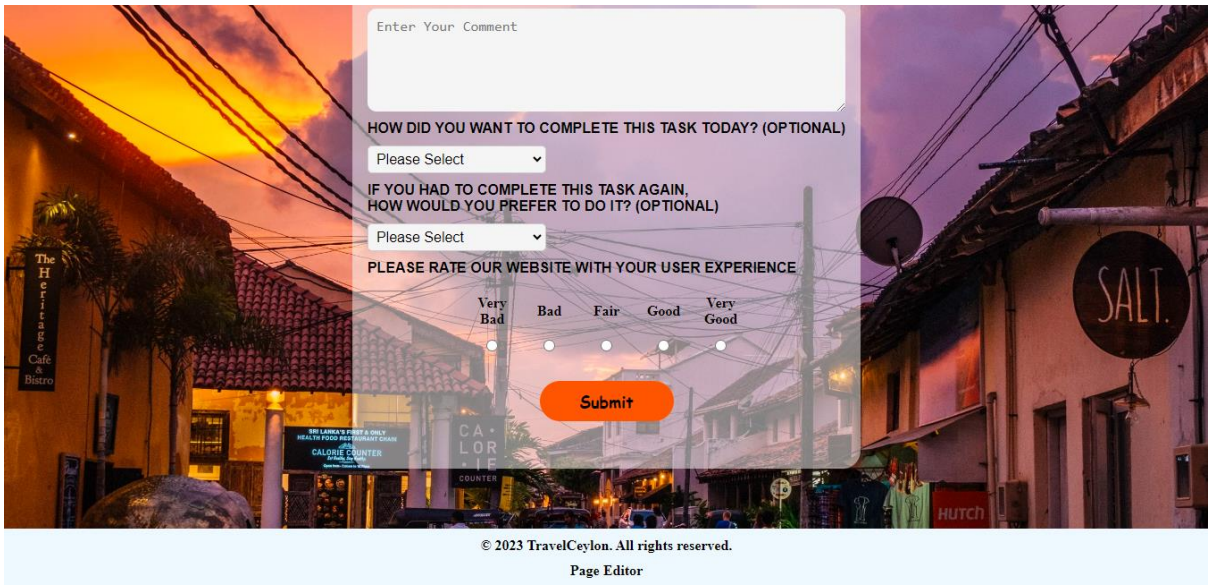

- **Video for Tourism Sri Lanka**

Appendix C: Screenshots - Webpage Validation Evidence

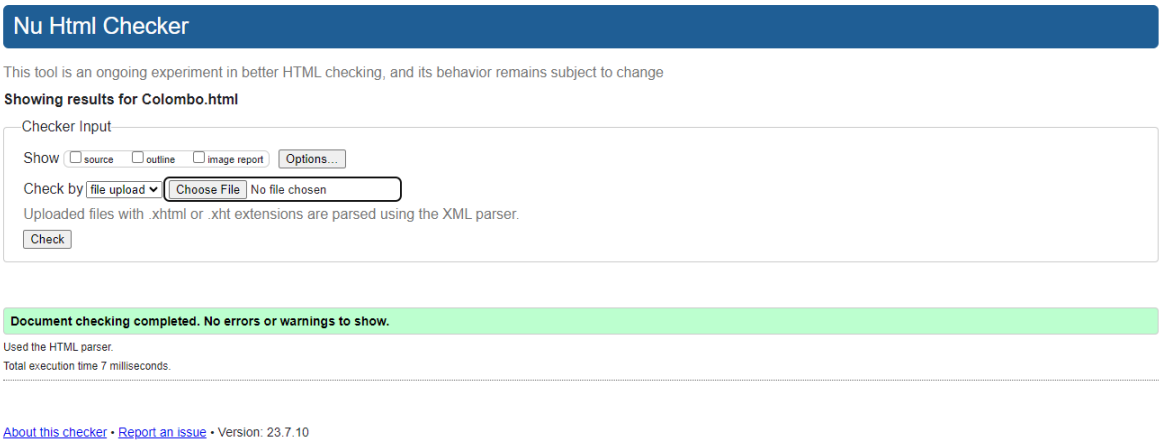

• Main (Home) Page

• Comments Page

• Content Page

Appendix D: Individual Statement

Student Name:	Thisanthan Rukmanikanthan	Student Id:	W1998661 / 20223209

State what tasks you carried out in the project.

- Created the homepage's theme and structure.
- Created Comment form.
- Set up navigation bars to link pages.
- Added external CSS to the header and footer of the website.
- Java script was used to create a dynamic query form that can be delivered through email and is validated.

State what you enjoyed and did not enjoy about teamwork.

- I liked the part where the crew talked about every problem and found solutions.

State what you learnt about teamwork.

- I gained knowledge from this course work in the areas of teamwork, resource management, and time management.

State what skills you gained/learnt from undertaking the project.

- Respecting the thoughts, opinions, and viewpoints of other members.
- Talents in communication.
- Additional understanding of JavaScript and CSS.
- Learned about some GitHub commands.

State any strengths about yourself that emerged whilst undertaking the project.

- Communication skills.
- Respecting other people's viewpoints.
- Timeliness and good planning.

State any weaknesses about yourself that emerged whilst undertaking the project.

- I made some carelessness mistakes when making this project.

State how you would do things better if you were to undertake the project again.

- Should improve my knowledge of HTML, CSS, and JavaScript to create a more responsive website.

Additional general or project specific comments:

- I realized the importance of self-studying and the existence of search engines.

Appendix E: Task Completion Checklist

Complete the table to indicate if any of your tasks were not completed or partially completed.

Student 2 Tasks	Completed			Student Comments
	Yes	No	Partially	
2a - Main (Home) Page	√			Task completed
2b - Main site navigation	√			Task completed
3 - Query Form	√			Task completed
9b - External CSS (9a reused)	√			Task completed
10 - Extra content page/anchors	√			Task completed
11 - Page Editor	√			Task completed
12 - Logo/Page Editor	√			Task completed
13 - Additional Interactivity	√			Task completed
14 - Uploaded to Server
