DO NOT REMOVE THIS QUESTION PAPER FROM THE ROOM

It must be returned to the test invigilator at the end of the test

You may use this paper for your rough work, but all your answers must be entered on the Blackboard test.

You have been asked to produce the Cup Cake selling website as shown below. The first picture (Figure1) illustrate the webpage showing the positioning and alignment of the various components of the page. The second picture (Figure2) shows what happens when the user hovers over on one of the navigation options (in the example below in Figure3, the user hovers over "About"). You will find the code for the CSS file and the HTML file at the end of the description. The code contains gaps numbered from 1 to 41. You will need to take the associated Blackboard test.

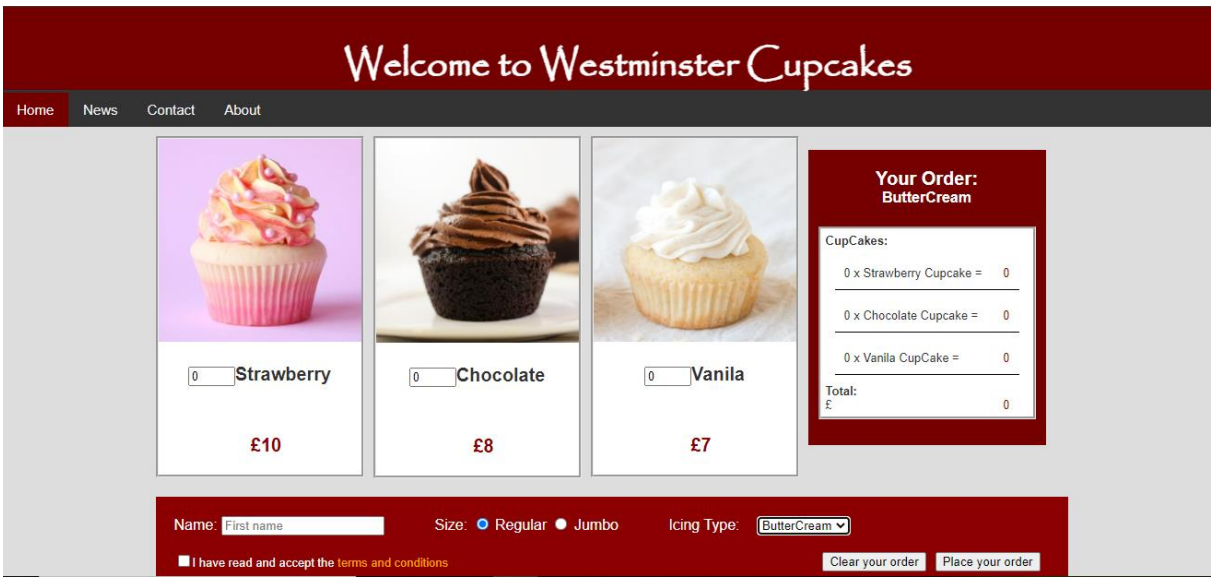

Figure 1:-Main Page

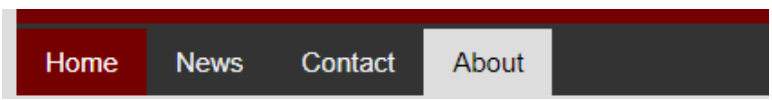

Figure 2: – Example of what happens when the user hovers over "About"

Here are a few more details regarding the website:

- It use of the sans-serif font.
- Level 1 heading will be displayed using the font Papyrus, or fantasy, the color code #8B0000, and font size 40. The text will also be aligned in the center.
- The container is centred on the page, using an automatic margin that will always split the remaining space between left and right.
- ' Welcome to Westminster Cupcakes' is a level 1 heading.
- The header section which contains the heading will be fixed when scrolling the website.
- The product items have a styled border as 'groove'.
- The default underline on the links in the main navigation has been removed.
- When hovering over the navigation options, these get displayed as shown in Figure 3 above and the color of the font changes to black with background color #ddd.
- The element of navigation with the "active" class gets a #740000 as background color
- There is a 10px margin at the top and right sides of the all 3 product items (cupcakes) and no margin at the left and bottom.
- The web page for terms and conditions is conditions.html.
- The menu items for the regular size (default size) Westminster Cupcakes are as below:
  - Strawberry Cupcake:
    - Image File: strawberrymini.jpg
    - £10
    - alternative text is 'picture of a strawberry cupcake'
  - Chocolate Cupcake:
    - Image file: chocolatemini.jpg
    - £8
    - alternative text is 'picture of a chocolate cupcake'
  - Vanila Cupcake:
    - Image file: vanilamini.jpg
    - £7
    - alternative text is 'picture of a vanilla cupcake'

- All other information can be deducted by observing the screenshots and code provided.

NOTE, in the CSS section, the semicolon ';' is not part of the gap, so DO NOT ADD A SEMICOLON AT THE END OF YOUR ANSWER

CSS File:

```
